PERSONAL STATEMENT

Aspiring backend developer skilled in Python, Node.js, Express.js and REST APIs, with experience in MongoDB, JWT and open-source contributions. Seeking a backend internship to grow scalable systems, database design, and deployment skills.

TECHNICAL SKILLS

Languages	Python (Advanced), Java (Basics), C++ (Intermediate)
Frontend	HTML, CSS, Tailwind CSS, React.js
Backend	Node.js, Express, JWT Authentication, REST APIs
Databases	MongoDB
Tools & Platforms	Git, Linux (Arch — GNOME), Render, Netlify, Vercel

PROJECTS

QuickGPT · github.com/Shashank-Venkatesh

Dec 2025 – Jan 2026

- Developed a backend-focused AI project to explore scalable file structure, modular code organisation, and third-party API integration.
- Stack: Node.js, Express.js, MongoDB, REST APIs, Stripe API, Gemini API, ImageKit.io.
- Served as a learning project to explore real-world backend workflows, API request-response cycles, and service integration patterns; used as a reference during peer reviews and interviews.
- Resolved multiple integration issues with ImageKit.io while debugging subtle codebase errors.

SyncTroop · github.com/Shashank-Venkatesh

Mar 2025 – May 2025

- Built a productivity-focused task management web app enabling users to create and organise tasks efficiently.
- Stack: MERN (MongoDB, Express.js, React.js, Node.js), Tailwind CSS, JWT, Firebase Auth, Socket.io, Render, Netlify.
- Helps individuals and teams manage workflow with focus sprints that improve efficiency; praised in peer feedback for usability and responsive UI.
- Gained experience in API design, real-time communication with Socket.io, authentication workflows, and deployment management with Render and Netlify.

EDUCATION

Kalvium's UG Program in CS (Software Product Engineering)

2024 – 2028 | Campus: Chennai

Bachelor's enrolment: B.Tech, Vel's Institute of Science, Technology and Advanced Studies.

ACHIEVEMENTS & EXTRACURRICULARS

Hackathons & Competitions

- Secured 2nd place in the "Debug the Code" competition run by the Coding Club, competing across the B.Tech CSE department (31 July 2025).

Open Source — Mathesar Foundation

- Selected (Nov 2025) through a competitive screening process after completing onboarding, Linux setup, and a 3-week FOSS Sprint via the Kalvium × Mathesar program.
- Passed screening with an initial PR and was invited to the 9-week Mathesar Sprint.
- Contributed under mentorship from Mathesar engineers (Dec 2025 – Jan 2026, ~2 months), collaborating with a global open-source team.
- Tech exposure: Svelte, Postgres UI flows, Git collaboration, code reviews, CI, and open-source best practices.
